

I am against any weakening of New Jersey's Do Not Call Laws. All the telemarketers will do is utilize any changes to find loopholes and opportunities to weaken them further.

They are invading my privacy and rights!

In fact, I would like to see the law expanded to include a Do Not Fax clause. I get unsolicited, unwanted faxes all the time. AND, at my expense because they consume the ink from my machine. Ink is very expensive!

When I call the phone number to request removal of my fax number from their list (each fax contains this statement and number) I continue to get the same type faxes but the number is different each time. Yet, another example of how they find loopholes and create their own opportunities.

This must stop!
